PROFIL

Hai, saya Owen, seorang Platform Engineer lulusan Computer Science BINUS dengan pengalaman membangun dan mengelola Infrastruktur TI modern. Berpengalaman dalam membangun CI/CD Pipeline, mengelola orkestrasi kontainer dengan Kubernetes, serta menerapkan monitoring dan logging. Saya pekerja keras dan memiliki semangat belajar tinggi.

SKILLS

- Docker, Kubernetes, Jenkins
- IaasC (Terraform)
- Cloud Platform (GCP/Alicloud)
- Monitoring (Prometheus, Grafana)
- Logging (ELK)
- Linux, Bash, Python
- Secret Management (Vault/Consul)
- Internal Development Platform (Port)
- Security (Snyk, SonarQube, Docker Scout)
- Adaptif

PENDIDIKAN

SMA STRADA SANTO THOMAS AQUINO

Jurusan IPA

2017 - 2020

UNIVERSITAS BINA NUSANTARA

Jurusan Teknik Informatika

2020 - 2024

PENGALAMAN

PT. ADIRA DINAMIKA MULTI FINANCE

DEVOPS ENGINEER INTERN (2023 - 2024)

Berfokus pada automation dan integration tim development dan operation

- Mengelola CI/CD Pipeline
- Mengotomasi proses Build, Scan, hingga Deployment
- Mengelola Docker Containerization
- Berkontribusi dalam integrasi Logging dengan ELK
- Mengelola Alerting dengan Grafana
- Mengelola Cloud Platform GCP dan Alicloud

INFRASTRUCTURE ENGINEER (2024)

Berfokus pada manajemen infrastruktur aplikasi

- Membuat Server Jenkins alternatif yang menghubungkan agentnya untuk deploy aplikasi di Jenkins utama
- Berkontribusi dalam pembuatan end to end menggunakan proses otomasi Python dan BigQuery GCP dari proses Kafka
- Mengimplementasi DR (Disaster Recovery) dari Cloud Platform utama ke Cloud Platform sekunder

PLATFORM ENGINEER (2024 - 2025)

Berfokus pada manajemen arsitektur aplikasi dan menyediakan platform self-service

- Berkontribusi dalam transformasi arsitektur dari sistem berbasis NGINX virtual host ke arsitektur service mesh berbasis Istio
- Mengelola IDP dengan GetPort untuk membuat self-service yang dibutuhkan developer untuk mengurangi manual proses
- Mengimplementasi Trunk-based Development pada proses deployment aplikasi

PROFILE

I'm Owen Thamrin, a Platform Engineer and Computer Science graduate from BINUS University with practical experience in modern IT infrastructure. I specialize in CI/CD pipelines, Kubernetes orchestration, and observability solutions. Passionate about learning and delivering reliable, scalable systems.

SKILLS

- Docker, Kubernetes, Jenkins
- IaC (Terraform)
- Cloud Platform (GCP/Alicloud)
- Monitoring (Prometheus, Grafana)
- Logging (ELK)
- Linux, Bash, Python
- Secret Management (Vault/Consul)
- Internal Development Platform (Port)
- Security (Snyk, SonarQube, Docker Scout)
- Adaptive

EDUCATION

STRADA SANTO THOMAS AQUINO HIGH SCHOOL

Science

2017 - 2020

BINA NUSANTARA UNIVERSITY

Computer Science

2020 - 2024

EXPERIENCE

PT. ADIRA DINAMIKA MULTI FINANCE

DEVOPS ENGINEER INTERN (2023 - 2024)

Focused on automation and DevOps integration

- Managing CI/CD pipelines
- Automating build, scan, and deployment processes
- Experienced in Docker containerization
- ELK-based logging
- Grafana alerting
- Managing Google Cloud Platform dan Alicloud

INFRASTRUCTURE ENGINEER (2024)

Focused on application infrastructure management

- Built an alternative Jenkins server as a remote agent for deployment
- Contributed to end-to-end automation using Python, Kafka, and BigQuery on GCP
- Implemented disaster recovery from primary to secondary cloud platforms

PLATFORM ENGINEER (2024 - 2025)

Focused on application architecture management and providing self-service platforms

- Contributed to the transformation from NGINX-based architecture to an Istio service mesh
- Managed IDP using Port to enable developer self-service and reduce manual processes
- Implemented trunk-based development for application deployment
